

# Electric Counters Non-Reset Type, Series E2B

E2B62D

### *Rugged, Reliable and Versatile Electric Counter*

The Compac Model E2B is a line of rugged, reliable and extremely long-life electrical counters available with 5, 6 or 7-digits in a variety of mounting styles.

It features a dependable electro-mechanical reciprocating verge ratched drive, made of Delrin, which has achieved a popular acclaim. "L" shaped mounting holes permit a variety of mounting centers for base mounting or back of panel installation, making the unit conveniently interchangeable with existing counters. It also may be mounted front of panel.

Recommended for vending, amusement, dry cleaning, and photocopy machines; laboratory testing; totalizing production machinery; and related applications.

- Plated Steel Cover
- Reciprocating Delrin Verge Ratchet Drive
- Available in Many Standard Variations
- Interchangeable Mounting Holes
- RU and C.S.A. Listed
- ISO 9001

## Models

### 6-Digit Models

Voltage	Part No.
115 AC	E2B62D
230 AC	E2B61D
24 AC	E2B64D

### 6-Digit Models

Voltage	Part No.
24 DC	E2B65D
12 DC	E2B612D
6 DC	E2B510D

### 5-Digit Models

Voltage	Part No.
115 AC	E2B52DC05
230 AC	E2B51DC05
24 AC	E2B54DC05

### 5-Digit Models

Voltage	Part No.
24 DC	E2B55DC05
12 DC	E2B512DC05
6 DC	E2B510DC05

## Specifications

Figures:	5, 6 or 7-digits; black on white
Figure Dimensions:	5-digits, .156" H x .140" W 6- and 7-digits, .140" H x .093" W
Reset:	none
Speed Rating:	600 cpm; 1/2 count on power stroke, 1/2 count on return
Voltage:	115 V, 50/60 Hz Standard Others Available
Power Consumption:	6 Watts
Drive:	Reciprocating Verge
Mounting:	Universal base, back of panel or front of panel
Weight:	5 oz. net
